ICAEW Certificate in Finance, Accounting and Business (ICAEW CFAB)

The ICAEW Certificate in Finance, Accounting and Business (ICAEW CFAB) is an internationally recognised certificate that teaches essential knowledge in business, finance and accounting and provides the practical skills and knowledge needed for today's competitive business world.

ICAEW CFAB - HOW IT CAN HELP

The ICAEW Certificate in Finance, Accounting and Business (ICAEW CFAB) has six modules which can be started at any time of year and can be studied on its own or gained alongside a college course, degree course or work commitments.

ICAEW CFAB consists of the same six exams as the first level of our world-leading chartered accountancy qualification, the ACA, which includes:

- Accounting
- Assurance
- Business, Technology and Finance
- Law
- Management Information
- Principles of Taxation

ICAEW CFAB is a standalone qualification, it also forms part of our Level 4 Professional Accounting Technician Apprenticeship.

ICAEW CFAB PRACTICAL SKILLS AND KNOWLEDGE

Having a good understanding of business, finance and accounting is highly valued in almost any role in any organisation around the world. The ICAEW Certificate in Finance, Accounting and Business (ICAEW CFAB) teaches practical skills and knowledge including:

- understanding of the key elements of finance, accounting and business;
- understanding of the wider business issues;
- helping individuals talk the language of finance;
- appreciating the main factors linked to business success or failure;

- understanding of the key decisions that businesses and management teams have to make on a day-to-day basis;
- how to monitor business risk and evaluate business performance; and
- providing the skills to help individuals write a business plan, prepare their own personal tax statements and manage their finances more confidently.

ASSESSMENT

Each exam module is examined by a 1.5-hour computer-based exam, and can be sat throughout the year at an ICAEW approved test centre (subject to exam centre availability). The pass mark for each exam is 55%. Students have a maximum of four attempts at each exam.

ETHICS

Ethics is embedded throughout the qualification and there are specific learning outcomes included in a number of the exam modules. The syllabus has been designed to ensure students understand the fundamental principles of ethics, can apply relevant ethical guidance and are able to recommend actions to resolve ethical issues.

CREDIT FOR PRIOR LEARNING

Students who are studying, or those who already hold a degree with components of business, law or finance, may be eligible for exam credit against some of the ICAEW CFAB exam modules. The Accounting module is mandatory for all ICAEW CFAB students.

Please visit [icaew.com/cfabcppl](https://www.icaew.com/cfabcppl) for further information.

SYLLABUS

This document presents the learning outcomes for each of the ICAEW CFAB exams. The learning outcomes in each exam should be read in conjunction with the relevant technical knowledge grid at the end of this document.

Certificate Level

Accounting

MODULE AIM

To ensure that students have a sound understanding of the techniques of double entry accounting and can apply its principles in recording transactions, adjusting financial records and preparing non-complex financial statements.

On completion of this module, students will be:

- proficient in the use of double entry accounting techniques and the maintenance of accounting records;
- able to identify and correct omissions and errors in accounting records and financial statements; and
- able to specify the components of financial statements and prepare and present non-complex financial statements for sole traders, partnerships and limited companies.

METHOD OF ASSESSMENT

The Accounting exam is 1.5 hours long. 40% of the marks are allocated from the preparation of single company financial statements; either a statement of profit or loss and statement of financial position or a statement of cash flows, using a pro-forma template. The remaining 60% of the marks are from 24 multiple-choice, multi-part multiple choice or multiple-response questions. These questions will cover the areas of the syllabus in accordance with the weightings set out in the specification grid.

ETHICS

Ethics is an overarching requirement for the professional accountant and students will be expected to recognise that the exercise of judgement is required in applying fundamental accounting concepts. Students will learn about the IESBA Code of Ethics for Professional Accountants - fundamental principles and the ICAEW Code of Ethics and consider the merits of a principles-based code. Specific questions on this area are included within the 'Maintaining financial records' weighting in the Specification Grid.

SPECIFICATION GRID

This grid shows the relative weightings of subjects within this module and should guide the relative study time spent on each. Over time the marks available in the assessment will equate to the weightings below, while slight variations may occur in individual assessments to enable suitably rigorous questions to be set.

SYLLABUS AREA	WEIGHTING
1 Maintaining financial records	30%
2 Adjustments to accounting records and financial statements	25%
3 Preparing financial statements	45%

The following learning outcomes should be read in conjunction with the relevant sections of the technical knowledge grids at the end of this document.

1 MAINTAINING FINANCIAL RECORDS

Students will be proficient in the use of double entry accounting techniques and the maintenance of accounting records.

In the assessment, students may be required to:

- a. specify why an entity maintains financial records and prepares financial statements;
- b. specify the ethical considerations for preparers of financial statements;
- c. identify the sources of information for the preparation of accounting records and financial statements;
- d. record and account for transactions and events resulting in income, expenses, assets, liabilities and equity in accordance with the appropriate basis of accounting and the laws, regulations and accounting standards applicable to the financial statements;
- e. record and account for changes in the ownership structure and ownership interests in an entity; and
- f. prepare a trial balance from accounting records and identify the uses of the trial balance.

2 ADJUSTMENTS TO ACCOUNTING RECORDS AND FINANCIAL STATEMENTS

Students will be able to identify and correct omissions and errors in accounting records and financial statements.

In the assessment, students may be required to:

- a. identify omissions and errors in accounting records and financial statements and demonstrate how the required adjustments will affect profits and/or losses;
- b. correct omissions and errors in accounting records and financial statements; and
- c. prepare journals for nominal ledger entry and to correct errors in draft financial statements.

3 PREPARING FINANCIAL STATEMENTS

Students will be able to specify the components of financial statements, and prepare and present non-complex accounts for sole traders, partnerships and limited companies.

In the assessment, students may be required to:

- a. identify the main components of a set of financial statements and specify their purpose and interrelationship;

- b. specify the key aspects of the accrual basis of accounting and the cash basis of accounting; and
- c. prepare and present a statement of financial position, statement of profit or loss, statement of changes in equity and statement of cash flows (or extracts) from the accounting records and trial balance in a format which satisfies the information requirements of the entity.

Assurance

MODULE AIM

To ensure that students understand the assurance process and fundamental principles of ethics, and are able to contribute to the assessment of internal controls and gathering of evidence on an assurance engagement.

On completion of this module, students will be able to:

- explain the concept of assurance, why assurance is required and the reasons for assurance engagements being carried out by appropriately qualified professionals with an attitude of professional scepticism and the exercise of professional judgement;
- explain the nature of internal controls and why they are important, document an organisation's internal controls and identify weaknesses in internal control systems;
- select sufficient and appropriate methods of obtaining assurance evidence and recognise when conclusions can be drawn from evidence obtained or where issues need to be referred to a senior colleague; and
- understand the importance of ethical behaviour to a professional and identify issues relating to integrity, objectivity, professional competence and due care, confidentiality, professional behaviour and independence.

SPECIFICATION GRID

This grid shows the relative weightings of subjects within this module and should guide the relative study time spent on each. Over time the marks available in the assessment will equate to the weightings below, while slight variations may occur in individual assessments to enable suitably rigorous questions to be set.

SYLLABUS AREA	WEIGHTING
1 The concept, process and need for assurance	20%
2 Internal controls	25%
3 Gathering evidence on an assurance engagement	35%
4 Professional ethics	20%

The following learning outcomes should be read in conjunction with the relevant sections of the technical knowledge grids at the end of this document.

METHOD OF ASSESSMENT

The Assurance exam is 1.5 hours long. The exam consists of 50 questions worth two marks each, covering the areas of the syllabus in accordance with the weightings set out in the specification grid. The questions are presented in the form of multiple choice, multi-part multiple choice, or multiple response.

ETHICS AND PROFESSIONAL SCEPTICISM

The importance of ethics both as a knowledge area and as a behaviour to be demonstrated is reflected in the syllabus area below 'Professional ethics'. The learning outcomes cover a range of threats and dilemmas to be identified as well as safeguards and solutions to be resolved. Professional scepticism is included in the requirement for the syllabus area 'The concept, process and need for assurance' where students are also required to recognise the need for the exercise of professional judgement.

1 THE CONCEPT, PROCESS AND NEED FOR ASSURANCE

Students will be able to explain the concept of assurance, why assurance is required and the reasons for assurance engagements being carried out by appropriately qualified professionals.

In the assessment, students may be required to:

- a. define the concept of assurance and compare the purposes and characteristics of reasonable and limited levels of assurance obtained from different assurance engagements;
- b. state why users desire assurance reports and provide examples of the benefits gained from them such as to assure the quality of an entity's published corporate responsibility or sustainability report;
- c. compare the functions and responsibilities of the different parties involved in an assurance engagement;
- d. identify the issues which can lead to gaps between the outcomes delivered by the assurance engagement and the expectations of users of the assurance reports, and suggest how these can be overcome;
- e. identify the steps involved in obtaining, accepting and agreeing the terms of an assurance engagement;
- f. identify the process of planning an assurance engagement, including risk assessment;
- g. define materiality and identify its role in the assurance engagement;
- h. identify how the assurance provider reports to the engaging party;
- i. recognise the need to plan and perform assurance engagements with an attitude of professional scepticism and the exercise of professional judgement; and
- j. recognise the characteristics of fraud and distinguish between fraud and error.

2 INTERNAL CONTROLS

Students will be able to explain the nature of internal controls and why they are important, document an organisation's internal controls and identify weaknesses in internal control systems.

In the assessment, students may be required to:

- a. state the reasons for organisations having effective systems of control;

- b. identify the fundamental principles of effective control systems;
- c. identify the main business processes of an entity and data flows between areas of the business that need effective control systems;
- d. identify the components of internal control in both manual and IT environments;
- e. define and classify different types of internal control, with particular emphasis upon those which impact upon the quality of financial information and identify the difference between preventative and detective controls;
- f. show how specified internal controls mitigate risk, including cyber risks, and state their limitations;
- g. identify internal controls or internal control deficiencies for an organisation in a given scenario;
- h. identify the role of an internal audit function in an organisation; and
- i. identify, for a specified organisation, the sources of information which will enable a sufficient record to be made of accounting or other systems and internal controls.

3 GATHERING EVIDENCE ON AN ASSURANCE ENGAGEMENT

Students will be able to select sufficient and appropriate methods of obtaining assurance evidence and recognise when conclusions can be drawn from evidence obtained or where issues need to be referred to a senior colleague.

In the assessment, students may be required to:

- a. state the reasons for preparing and keeping documentation relating to an assurance engagement;
- b. identify the different methods of obtaining evidence from the use of tests of control, substantive procedures, including analytical procedures and data analytics;
- c. recognise the strengths and weaknesses of the different methods of obtaining evidence;
- d. identify the situations within which the different methods of obtaining evidence should and should not be used;
- e. compare the reliability of different types of assurance evidence;
- f. select appropriate methods of obtaining evidence from tests of control and from substantive procedures for a given business scenario;

- g. recognise when the quantity (including factors affecting sample design) and quality (including analysis of data) of evidence gathered is of a sufficient and appropriate level, after taking account of sampling risk, to draw conclusions on which to base a report;
- h. identify the circumstances in which written confirmation of representations from management should be sought and the reliability of such confirmation as a form of assurance evidence; and
- i. recognise issues arising while gathering assurance evidence that should be referred to a senior colleague.
- i. identify steps to comply with GDPR and prevent the disclosure of information;
- j. identify situations in which confidential information may be disclosed, including where reporting suspicions of money laundering;
- k. identify the following threats to the fundamental ethical principles and the independence of assurance providers:
 - self-interest threat
 - self-review threat
 - management threat
 - advocacy threat
 - familiarity threat
 - intimidation threat;
- l. identify safeguards to eliminate or reduce threats to the fundamental ethical principles and the independence of assurance providers; and
- m. suggest how a conflict of loyalty between the duty a professional accountant has to their employer and the duty to their profession could be resolved.

4 PROFESSIONAL ETHICS

Students will be able to understand the importance of ethical behaviour to a professional and identify issues relating to integrity, objectivity, professional competence and due care, confidentiality, professional behaviour and independence.

In the assessment, students may be required to:

- a. state the role of ethical codes and their importance to the profession and identify the key features of the system of professional ethics adopted by IESBA and ICAEW;
- b. recognise the differences between a rules-based ethical code and one based upon a set of principles;
- c. recognise how the principles of professional behaviour protect the public and fellow professionals;
- d. identify the fundamental principles underlying the ICAEW Code of Ethics;
- e. recognise the importance of integrity, objectivity and independence to professional accountants, identifying situations that may impair or threaten integrity, objectivity and independence;
- f. suggest courses of action to resolve ethical conflicts relating to integrity, objectivity and independence;
- g. respond appropriately to the request of an employer to undertake work outside the confines of an individual's expertise or experience;
- h. recognise the importance of confidentiality, including compliance with GDPR, and identify the sources of risks of accidental disclosure of information;

Business, Technology and Finance

MODULE AIM

To provide students with an understanding of how businesses operate and how finance functions help businesses to achieve their objectives.

On completion of this module, students will be able to:

- identify the general objectives of businesses and the functions and tasks that businesses perform in order to meet their objectives;
- specify the nature, characteristics, advantages and disadvantages of different forms of business and organisational structure;
- identify the purpose of financial information produced by finance functions, specify how finance functions support business operations, including the measurement of risk, and identify sources and methods of financing for businesses;
- specify the importance and attributes of the accountancy profession and the role that governance plays in the management of a business, including how a business can promote corporate governance, sustainability, corporate responsibility and an ethical culture;
- specify the impact on a business of the external environment in which it operates; and
- specify key issues in relation to data and its collection, visualisation and analysis, and identify key features, benefits and risks of different technologies.

METHOD OF ASSESSMENT

The Business, Technology and Finance exam is 1.5 hours long. The exam consists of 50 questions worth two marks each, covering the areas of the syllabus in accordance with the weightings set out in the specification grid. The questions are presented in the form of multiple choice, or multiple response.

ETHICS AND PROFESSIONAL SCEPTICISM

Ethical thinking will be required across all areas of the syllabus. A specific weighting is given in the syllabus area 'Key issues for the accountancy profession and business' which includes ethics and business ethics, in the table below. The policies and procedures necessary to promote an ethical culture will be emphasised. Students will be expected to apply professional scepticism. Additionally, under the syllabus area 'The external environment of business', students must demonstrate an awareness of the needs of different stakeholders and in the 'Technology and data analysis' area they must be able to identify types of data bias, their causes and effects.

SPECIFICATION GRID

This grid shows the relative weightings of subjects within this module and should guide the relative study time spent on each. Over time the marks available in the assessment will equate to the weightings below, while slight variations may occur in individual assessments to enable suitably rigorous questions to be set.

SYLLABUS AREA	WEIGHTING
1 Business objectives and functions	10%
2 Business and organisational structures	10%
3 The role of finance and the finance function	25%
4 Key issues for the accountancy profession and business	20%
5 The external environment of business	15%
6 Technology and data analysis	20%

The following learning outcomes should be read in conjunction with the relevant sections of the technical knowledge grids at the end of this document.

1 BUSINESS OBJECTIVES AND FUNCTIONS

Students will be able to identify the general objectives of businesses and the functions and tasks that businesses perform in order to meet their objectives.

In the assessment, students may be required to:

- a. state the general objectives of businesses;
- b. state the general objectives of strategic management and specify the strategic management process and interrelationship between a business's vision, mission and strategic objectives;
- c. identify the functional areas within businesses (marketing, operations/production, procurement, HR, IT and finance) and show how the functions help the achievement of business objectives;
- d. identify the nature and functions of management, and show how this is influenced by human behaviour;
- e. identify the relationship between a business's overall strategy and its functional strategies and the nature and purpose of strategic plans, business plans and operational plans including how a strategic plan is converted into fully-integrated business and operational plans;
- f. identify the main components of the risk management process and show how they operate; and
- g. identify the key issues in relation to crisis management, business resilience, business continuity planning and disaster recovery.

2 BUSINESS AND ORGANISATIONAL STRUCTURES

Students will be able to specify the nature, characteristics, advantages and disadvantages of different forms of business and organisational structure.

In the assessment, students may be required to:

- a. identify the differences between businesses carried out by sole traders, partnerships, limited liability partnerships, companies, alliances and groups, and show the advantages and disadvantages of each of these business structures; and
- b. identify different organisational structures and specify their advantages and disadvantages.

3 THE ROLE OF FINANCE AND THE FINANCE FUNCTION

Students will be able to identify the purpose of financial information produced by finance functions, specify how finance functions support business operations, including the measurement of risk, and identify sources and methods of financing for businesses.

In the assessment, students may be required to:

- a. specify the role of financial information prepared by finance functions in:
 - supporting businesses in pursuit of their objectives, including business partnering
 - providing for accountability of management to shareholders and other stakeholders

- reflecting business position and performance
 - supporting users in making decisions;
- b. identify the main considerations in establishing and maintaining accounting and financial reporting functions and financial control processes;
 - c. identify, in the context of accounting and other systems, key aspects of:
 - information processing
 - information security
 - information management;
 - d. specify why the management of a business require performance measurements including in relation to sustainability, natural capital and climate change;
 - e. identify the accountant's role in preparing and presenting information for the management of a business;
 - f. specify types of risk and techniques for measuring risk, including: measures of central tendency (mean, mode, median, range); measures of spread (range, standard deviation, variance, co-efficient of variation); the normal distribution; skewness;
 - g. specify the relationship between a business and its bankers and other providers of financial products and services;
 - h. identify the characteristics, terms and conditions and role of alternative short, medium and long-term sources of finance available to different businesses;
 - i. identify the processes by which businesses raise equity, capital and other long-term finance, including green finance; and
 - j. identify appropriate methods of financing exports, including:
 - bills of exchange
 - letters of credit
 - export credit insurance.
- a. identify the importance of the accountancy profession to the public interest and to the effectiveness of capital markets, and the links between the public interest, technical competence and professional responsibility, including the attributes of professional scepticism, professional judgement and the public trust;
 - b. specify the key features of the regulatory framework within which professional accountants work including the basics of how anti-money laundering requirements affect them;
 - c. state the reasons why governance is needed and identify the role that governance plays in the management of a business;
 - d. identify the key stakeholders and their governance needs for a particular business;
 - e. identify and show the distinction between the roles and responsibilities of those charged with corporate governance and those charged with management, including the basics of the UK's corporate governance code;
 - f. specify how differences in legal systems and in national and business cultures affect corporate governance;
 - g. identify the roles and responsibilities within a business of the executive board, any supervisory board, the audit committee and others charged with corporate governance, the internal audit function and those responsible for the external audit relationship;
 - h. specify the nature of ethics, business ethics, sustainability and corporate responsibility; and
 - i. specify the policies and procedures a business should implement in order to promote an ethical culture.

4 KEY ISSUES FOR THE ACCOUNTANCY PROFESSION AND BUSINESS

Students will be able to specify the importance and attributes of the accountancy profession. Students will be able to identify the role that governance plays in the management of a business and how a business can promote corporate governance, sustainability, corporate responsibility and an ethical culture.

In the assessment, students may be required to:

5 THE EXTERNAL ENVIRONMENT OF BUSINESS

Students will be able to specify the impact on a business of the external environment in which it operates.

In the assessment, students may be required to:

- a. specify the signalling, rewarding and allocating effects of the price mechanism on business (including the concept of price elasticity);
- b. specify the potential types of failure of the market mechanism and their effects on business;

- c. identify the key macro-economic factors that affect businesses;
- d. specify the principal effects of national and international regulation upon businesses; and
- e. show how the needs of different stakeholders in a business (eg, shareholders, the local community, employees, suppliers, customers) impact upon it.

6 TECHNOLOGY AND DATA ANALYSIS

Students will be able to specify key issues in relation to data and its collection, visualisation and analysis, and identify key features, benefits and risks of different technologies.

In the assessment, students may be required to:

- a. specify the purpose of data, the different types and sources of data, the importance of data comparability and the role of professional scepticism in relation to data collection, analysis and visualisation;
- b. specify principles in relation to the collection and analysis of data, including populations, presentation of simple frequency distributions, basic sampling and data ethics;
- c. identify types of error in data and types of data bias, including their causes and effects;
- d. identify issues in relation to the visualisation and interpretation of data in graphs, charts etc;
- e. identify the characteristics of big data;
- f. specify uses of data science and data analytics by organisations;
- g. specify different types of cyber risk and attack and the steps organisations can take to improve cyber security;
- h. specify the features and uses of cloud accounting, the internet of things, digital assets, blockchain distributed ledger technology and fintech; and
- i. identify the effect of technology developments, including those relating to artificial intelligence, machine learning and robotic process automation, on the accountancy profession.

Law

MODULE AIM

To provide students with an understanding of the principles of English law.

On completion of this module, students will be able to:

- explain the nature of contractual agreements, the agency relationship and the consequences of negligence;
- understand the legal implications of incorporation, including the roles of shareholders and directors, and the main implications of insolvency law;
- identify instances of criminal behaviour that may be encountered by professional accountants; and
- identify other key areas in which the law affects the role and work of the professional accountant.

SPECIFICATION GRID

This grid shows the relative weightings of subjects within this module and should guide the relative study time spent on each. Over time the marks available in the assessment will equate to the weightings below, while slight variations may occur in individual assessments to enable suitably rigorous questions to be set.

SYLLABUS AREA	WEIGHTING
1 The impact of civil law on business and professional services	35%
2 Company and insolvency law	40%
3 The impact of criminal law on business and professional services	10%
4 The impact of law in the professional context	15%

The following learning outcomes should be read in conjunction with the relevant sections of the technical knowledge grids at the end of this document.

METHOD OF ASSESSMENT

The Law exam is 1.5 hours long. The exam consists of 50 questions worth two marks each, covering the areas of the syllabus in accordance with the weightings set out in the specification grid. The questions are presented in the form of multiple choice or multi-part multiple choice.

ETHICS AND PROFESSIONAL SCEPTICISM

The consideration of ethical decision-making is intrinsic to the study of law. In this module, students will examine the impact of criminal law on business and professional services, focussing on fraud, bribery and money laundering. They will also explore the relationships and interaction between legal principles, legislation, case law, ethics and ethical codes.

1 THE IMPACT OF CIVIL LAW ON BUSINESS AND PROFESSIONAL SERVICES

Students will be able to explain the nature of contractual agreements, the agency relationship and the consequences of negligence.

In the assessment, students may be required to:

CONTRACT

- a. recognise when a legally binding contract exists between two parties and how a contract may be enforced;
- b. identify the circumstances under which a contract can be terminated and possible remedies for breach of contract;

AGENCY

- c. identify the role of agents, their duties and rights, and their authority to enter contracts on behalf of principal;
- d. identify the nature of a partnership and the authority given to partners;

NEGLIGENCE AND LIABILITY

- e. identify instances and consequences of negligence (particularly negligent misstatement) in a given scenario; and
- f. identify instances and consequences of vicarious liability in a given scenario.

2 COMPANY AND INSOLVENCY LAW

Students will be able to understand the implications of incorporation, including the roles of shareholders and directors, and the main implications of insolvency law.

In the assessment, students may be required to:

- a. identify the differences between unincorporated businesses (sole traderships and partnerships), limited liability partnerships and companies, show the advantages and disadvantages of incorporation and recognise the circumstances when the veil of incorporation can be lifted;
- b. identify the procedures required to form a registered company or a limited liability partnership, including any practical considerations, and the nature and contractual force of a company's memorandum and articles of association and identify the advantages and disadvantages of off-the-shelf companies;

- c. identify the administrative consequences of incorporation or the formation of a limited liability partnership including requirements regarding statutory books, accounts, meetings and the role of the company secretary;
- d. identify the procedures for the issue of shares, including issues at a premium and pre-emption rights;
- e. identify the requirements of the Companies Act 2006 in respect of companies' statutory accounts and audit, including the exemptions for small and medium-sized companies and micro-entities;
- f. identify aspects of capital maintenance including:
 - reduction of capital
 - redemption and purchase of a company's own shares
 - financial assistance for the purchase of a company's own shares
 - distribution of profits;
- g. identify share transfer requirements and disclosure requirements;
- h. recognise how a shareholder can influence the management of a company through meetings and resolutions, including shareholders' rights to requisition a meeting;
- i. identify the various statutory rights of shareholders to challenge the management of the company under the Companies Act 2006 and the Insolvency Act 1986;
- j. identify the rights and duties which a member of a limited liability partnership possesses;
- k. identify the ways in which a director may be appointed and removed;
- l. identify directors' duties, explaining the consequences of any major breach;
- m. identify the powers of directors and in what circumstances they will bind the company in a contract with third parties;
- n. identify the nature of fixed and floating charges and the procedures for registering them;
- o. identify the nature and function of:
 - company voluntary arrangements
 - administration orders
 - receivership
 - compulsory and voluntary liquidation (including relevance of secured debt); and

- p. identify the main implications of insolvency law, including:
- the principal means of termination of companies or other business entities
 - the priorities on a liquidation of the distribution of assets including rights of creditors and employees (including secured assets)
 - bankruptcy and other responses to personal insolvency.

3 THE IMPACT OF CRIMINAL LAW ON BUSINESS AND PROFESSIONAL SERVICES

Students will be able to identify instances of criminal behaviour that may be encountered by professional accountants.

In the assessment, students may be required to:

- identify instances of money laundering and the obligations on professional accountants to detect and help prevent money laundering;
- identify offences and their consequences under the anti-money laundering legislation, and select appropriate courses of action to protect professional accountants from criminal liability;
- identify instances and consequences of bribery;
- identify instances and consequences of fraud in a given scenario, including:
 - the effect of the Fraud Act 2006
 - threats to consumers through cybercrime
 - offences created under the Computer Misuse Act 1990
 - fraudulent trading
 - insider dealing;
- recognise the relationships and interaction between legal principles, legislation, case law, ethics and ethical codes; and
- identify circumstances where accountants will be protected from dismissal and victimisation if they raise concerns about malpractice in the workplace.

4 THE IMPACT OF LAW IN THE PROFESSIONAL CONTEXT

Students will be able to identify other key areas in which the law affects the role and work of the professional accountant.

In the assessment, students may be required to:

INFORMATION AND ITS LEGAL ENVIRONMENT

- identify the key requirements of the Data Protection Act 2018, on the use of personal information and how the Act can affect the manner in which information systems are used by businesses;
- recognise the requirements of protecting intellectual property, including digital contexts;

EMPLOYMENT LAW AND SOCIAL SECURITY LAW

- identify who is an employee and the main legal consequences of employment status;
- identify the key features of employment contracts and recognise circumstances in which an employment contract may be terminated and the consequences arising;
- identify when dismissal constitutes:
 - a wrongful dismissal
 - an unfair dismissal;
- identify the circumstances where an employee can claim a statutory redundancy payment; and
- identify employers' obligations under social security law.

Management Information

MODULE AIM

To enable students to prepare essential financial information for the management of a business.

On completion of this module, students will be able to:

- establish the costs associated with the production of products and provision of services and use them to determine prices;
- select appropriate budgeting approaches and methods and prepare budgets;
- identify key features of effective performance management systems, select appropriate performance measures and calculate differences between actual performance and standards or budgets; and identify the key features, risks and benefits of a range of approaches to management information operations; and
- identify and calculate relevant data for use in management decision making.

METHOD OF ASSESSMENT

The Management Information exam is 1.5 hours long. 20% of the marks are allocated in one scenario-based question. This will cover a single syllabus area, either: costing and pricing; budgeting and forecasting; performance management; or management decision-making. The remaining 80% of the marks are from 32 multiple choice, multi-part multiple choice or multiple response questions. The 33 questions cover the areas of the syllabus in accordance with the weightings set out in the specification grid.

ETHICS AND PROFESSIONAL SCEPTICISM

Ethics is fundamental to the sound provision of management information upon which basis sustainable business decisions can be made. This will form a backdrop to an overall culture of business trust as well as business efficiency. It is treated as ingrained across the syllabus with a weighting of marks being given within the 'Costing and Pricing' syllabus area. Students will be expected to apply professional scepticism.

SPECIFICATION GRID

This grid shows the relative weightings of subjects within this module and should guide the relative study time spent on each. Over time the marks available in the assessment will equate to the weightings below, while slight variations may occur in individual assessments to enable suitably rigorous questions to be set.

SYLLABUS AREA	WEIGHTING
1 Costing and pricing; 5 Ethics	25%
2 Budgeting and forecasting	25%
3 Performance management and management information operations	25%
4 Management decision-making	25%

The following learning outcomes should be read in conjunction with the relevant sections of the technical knowledge grids at the end of this document.

1 COSTING AND PRICING

Students will be able to establish the costs associated with the production of products and provision of services and use them to determine prices.

In the assessment, students may be required to:

- a. recognise the use of cost information for different purposes;
- b. classify costs as fixed, variable, direct or indirect;
- c. calculate overhead absorption rates, unit costs and profits/losses from information provided, using:
 - marginal costing
 - absorption costing and reconcile the differences between the costs and profits/losses obtained;
- d. select the most appropriate method of costing for a given product or service;
- e. calculate the sales price for a given product or service using cost based pricing; and
- f. calculate transfer prices for specified sales to internal customers which take account of appropriate costs.

2 BUDGETING AND FORECASTING

Students will be able to select appropriate budgeting approaches and methods and prepare budgets.

In the assessment, students may be required to:

- a. recognise how forecasting techniques (including high/low, linear regression and time series analysis) help management in budgeting and forecasting;
- b. identify how data analytics can be used in budgeting and forecasting;
- c. identify issues relating to the collection of data (data bias) and interpretation of data (correlation v causation; professional scepticism) for budgeting and forecasting;
- d. prepare budgets, or budget extracts from information supplied;
- e. select the most appropriate of the following budgeting approaches and methods, taking into account their advantages and disadvantages for planning, control and motivation:
 - bottom-up and top-down approaches to generating and managing budgets

- activity-based, responsibility-based and product-based budget structures
 - zero-based and incremental budgeting;
- f. prepare a cash budget for a business which highlights the quantity and timing of cash surpluses and deficits;
 - g. calculate the cash cycle for a business and recognise its significance;
 - h. identify the constituent elements of working capital and treasury and specify the methods by which each element can be managed to optimise working capital and cash flows; and
 - i. recognise how a business manages surpluses and deficits predicted in cash budgets.

3 PERFORMANCE MANAGEMENT AND MANAGEMENT INFORMATION OPERATIONS

Students will be able to identify key features of effective performance management systems, select appropriate performance measures and calculate differences between actual performance and standards or budgets, and identify the key features, risks and benefits of a range of approaches to management information operations.

In the assessment, students may be required to:

- a. identify the reasons for, and key features of, effective performance management systems;
- b. select appropriate financial and non-financial performance measures which effectively encourage the business as a whole to meet its objectives;
- c. calculate differences between actual performance and standards or budgets in terms of price and volume effects and identify possible reasons for those differences;
- d. identify issues relating to the collection of data (data bias) and interpretation of data (professional scepticism) for performance management;
- e. identify the features of cloud accounting and its associated risks and benefits; and
- f. identify the features of shared service centres and their relative merits for the provision of management information.

4 MANAGEMENT DECISION MAKING

Students will be able to identify and calculate relevant data for use in management decision making.

In the assessment, students may be required to:

- a. calculate the breakeven point, contribution and margin of safety for a given product or service;
- b. allocate scarce resource to those products or services with the highest contribution per limiting factor;
- c. calculate the net present value, internal rate of return, payback period or accounting rate of return for a given project; and
- d. identify the advantages and disadvantages of the investment appraisal techniques specified in 4(c) above.

5 ETHICS

In the assessment, students may be required to:

- a. identify and explain ethical issues relating to the preparation, presentation and interpretation of financial information for the management of a business.

Principles of Taxation

MODULE AIM

To enable students to understand the general objectives of taxation and to calculate income tax, national insurance contributions, capital gains tax, corporation tax and VAT in straightforward scenarios.

On completion of this module, students will be able to:

- explain the general objectives of taxation, the influences upon the UK system of taxation, the different types of tax in the UK;
- recognise the ethical issues arising in the course of performing tax work;
- identify the obligations the UK system of taxation imposes on taxpayers and the implications of non-compliance;
- calculate the amount of income tax owed by or owed to individuals and the amount of national insurance payable;
- calculate the amount of capital gains tax payable by individuals and the chargeable gains subject to corporation tax;
- calculate the amount of corporation tax payable by companies; and
- calculate the amount of VAT owed by or owed to businesses.

SPECIFICATION GRID

This grid shows the relative weightings of subjects within this module and should guide the relative study time spent on each. In each assessment, the marks available will equate to the weightings below.

SYLLABUS AREA	WEIGHTING
1 Objectives, types of tax and ethics	10%
2 Administration of taxation	20%
3 Income tax and national insurance contributions	26%
4 Capital gains tax and chargeable gains for companies	10%
5 Corporation tax	14%
6 VAT	20%

The following learning outcomes should be read in conjunction with the relevant sections of the technical knowledge grids at the end of this document.

METHOD OF ASSESSMENT

The Principles of Taxation exam is 1.5 hours long. 20% of the marks are allocated to two scenario-based questions. These will each cover a single syllabus area: income tax and NIC, and corporation tax. The remaining 80% of the marks are from 40 multiple choice, multi-part multiple choice, multiple response or numeric entry questions. These questions will cover the remaining areas of the syllabus in accordance with the weightings set out in the specification grid.

The tax tables included in the ICAEW learning materials are provided to students on-screen in the exam.

ETHICS

The importance of ethics is fundamental to professional accountants working in the area of taxation. Learning outcomes relating to ethics and integrity are included within the syllabus area 'Objectives, types of tax and ethics' as shown in the table below. Students are required to identify the objectives of taxation; ethical principles, along with threats and safeguards as well as issues such as conflicts of interest, money laundering, tax avoidance and tax evasion.

1 OBJECTIVES, TYPES OF TAX AND ETHICS

Students will be able to explain the general objectives of taxation, the influences upon the UK system of taxation, the different types of tax in the UK, and will be able to recognise the ethical issues arising in the course of performing tax work.

In the assessment, students may be required to:

- a. identify the objectives of digitalisation of tax;
- b. identify the objectives of taxation in general terms of economic, social justice and environmental issues, the range of tax opportunities open to the government and the relative advantages of different types of tax in meeting the government's objectives;
- c. recognise the impact of relevant external influences on UK tax objectives and policies;
- d. classify entities as individuals, partnerships, or companies for tax purposes and state how they are taxed;
- e. identify who is liable for the following taxes, how the taxes apply to income and transactions, identify the government bodies responsible for the taxes, and determine when an individual or entity comes within the scope of the taxes:
 - capital gains tax
 - corporation tax
 - income tax
 - national insurance
 - VAT;
- f. recognise the importance of the budget cycle, tax year and the following sources of UK tax law and practice:
 - legislation
 - case law
 - HMRC manuals, statements of practice, extra-statutory concessions and press releases;
- g. identify the five fundamental principles given in the IESBA Code of Ethics for Professional Accountants and ICAEW Code of Ethics, and the guidance in relation to a tax practice with regard to:
 - the threats and safeguards framework
 - ethical conflict resolution; and
- h. identify the following:
 - conflicts of interest
 - money laundering
 - tax avoidance and tax evasion.

2 ADMINISTRATION OF TAXATION

Students will be able to identify the obligations the UK system of taxation imposes on taxpayers and the implications for taxpayers of non-compliance.

In the assessment, students may be required to:

- a. identify the records which companies and individuals must retain for tax purposes and state the periods for which the records must be retained;
- b. identify the key features of the PAYE and national insurance system and calculate PAYE tax codes for employees;
- c. identify the key features of the self-assessment system for both companies and individuals;
- d. determine, in straightforward cases, due dates for:
 - companies', sole traders', partnerships' and individuals' tax returns, tax payments and payments on account
 - businesses' VAT returns and payments
 - employers' PAYE and national insurance returns and payments;
- e. identify and calculate the interest and penalties due for:
 - late submissions of and/or incorrect returns
 - late and/or incorrect payments of tax; and
- f. identify the periods within which HMRC can enquire into a taxpayer's returns or other information and tax liabilities and recognise the taxpayer's right of appeal and the process for dealing with disputes.

3 INCOME TAX AND NATIONAL INSURANCE CONTRIBUTIONS

Students will be able to calculate the amount of income tax owed by or owed to individuals and the amount of national insurance payable.

In the assessment, students may be required to:

- a. recognise the main sources of taxable and non-taxable income;
- b. calculate the personal allowance available to an individual according to personal circumstances including the marriage allowance;
- c. calculate assessable employment income for an employee or director, including taxable and exempt benefits;

- d. recognise the badges of trade;
 - e. allocate given items of business expenditure as allowable or disallowable for tax purposes and calculate the adjusted trading profits after capital allowances on plant and machinery of a sole trader or partnership using the accrual basis of accounting;
 - f. allocate the tax adjusted profits of a partnership to each partner and calculate the tax assessable profits for each partner for any given tax year;
 - g. calculate the assessable trading profits for a new unincorporated business and identify the overlap profits on the commencement of trade;
 - h. calculate the assessable trading profits for a continuing business;
 - i. calculate the final assessable trading profits for an unincorporated business ceasing to trade;
 - j. calculate total taxable income and the income tax payable or repayable for individuals; and
 - k. calculate the total national insurance contributions payable by employees, employers and self-employed individuals.
- c. allocate given items of business expenditure as allowable or disallowable for tax purposes and calculate the adjusted trading profits after capital allowances on plant and machinery; and
 - d. calculate the taxable total profits and the corporation tax payable for a company resident in the UK which has a period of account of 12 months or less.

6 VAT

Students will be able to calculate the amount of VAT owed by or owed to businesses.

In the assessment, students may be required to:

- a. classify supplies in given straightforward situations as exempt, zero-rated, standard-rated, subject to a reduced rate of 5%, or outside the scope of VAT;
- b. recognise the implications of supplies being classified as reduced-rated, standard-rated, zero-rated or exempt;
- c. identify when a business could or should register or deregister for VAT and state the time limits;
- d. determine the tax point for a supply of goods or services;
- e. state the principles of VAT payable or repayable on the supply of goods or services by a taxable person and calculate the monthly, quarterly or annual VAT payable or repayable by a business; and
- f. state the alternative schemes for payment of VAT by businesses and calculate the VAT payable or repayable for a business using these.

4 CAPITAL GAINS TAX AND CHARGEABLE GAINS FOR COMPANIES

Students will be able to calculate the amount of capital gains tax payable by individuals and the chargeable gains subject to corporation tax.

In the assessment, students may be required to:

- a. classify persons, assets and disposals as either chargeable or exempt for capital gains purposes;
- b. calculate the chargeable gains and losses on the disposal of assets;
- c. calculate total taxable gains for both individuals and companies; and
- d. calculate the capital gains tax payable by individuals.

5 CORPORATION TAX

Students will be able to calculate the amount of corporation tax payable by companies.

In the assessment, students may be required to:

- a. identify accounting periods for a company;
- b. recognise the interaction of having one or more related 51% group companies with corporation tax payment dates;

Technical knowledge

The tables contained in this section show the technical knowledge in the disciplines of financial reporting, audit and assurance, business analysis, ethics and taxation covered in the ACA syllabus by module.

For each individual standard the level of knowledge required in the relevant Certificate and Professional Level module and at the Advanced Level is shown.

The knowledge levels are defined as follows:

LEVEL D

An awareness of the scope of the standard.

LEVEL C

A general knowledge with a basic understanding of the subject matter and training in its application thereof sufficient to identify significant issues and evaluate their potential implications or impact.

LEVEL B

A working knowledge with a broad understanding of the subject matter and a level of experience in the application thereof sufficient to apply the subject matter in straightforward circumstances.

LEVEL A

A thorough knowledge with a solid understanding of the subject matter and experience in the application thereof sufficient to exercise reasonable professional judgement in the application of the subject matter in those circumstances generally encountered by chartered accountants.

KEY TO OTHER SYMBOLS:

→ The knowledge level reached is assumed to be continued
