ACA overview

The ICAEW chartered accountancy qualification, the ACA, is one of the most advanced learning and professional development programmes available. Its integrated components provide an in-depth understanding across accountancy, finance and business. Combined, these components help build the technical knowledge, professional skills and practical experience needed to become an ICAEW Chartered Accountant.

Each component is designed to complement each other, which means that students can put theory into practice and can understand and apply what they learn to their day-to-day work.

The four components are:

ICAEW constantly reviews the content of the ACA qualification to reflect real life business challenges. Today's most urgent business challenges range from sustainability, to rapid changes in technology and the role of ethics in the profession. We work closely with employers, tuition providers, academics and examiners to ensure that the ACA equips the chartered accountants of the future with the skills and knowledge they need to meet these challenges and to be successful.

THE ACA QUALIFICATION AND SUSTAINABILITY

Finance and accounting professionals need to move beyond simply measuring and reporting the impact of climate change, environmental regulation, supply chain pressure and rising energy costs. They must focus on understanding those implications and integrating them into financial management and business planning. ICAEW has been at the forefront of this movement over the past decade and has adapted the ACA qualification to reflect that. We see its role as not simply integrating knowledge and understanding the broader implications of environmental, social and governance issues into organisations, but also seeding this thinking into the mindset of our members.

Our syllabus and ethical and professional development framework contribute toward creating ICAEW Chartered Accountants who recognise that sustainability is at the core of what they do and are capable of actively using their business skills to analyse how to make the new sustainable economy work for their business.

THE ACA QUALIFICATION AND TECHNOLOGY

Rapid growth in technology has automated many compliance elements of accountancy. But, with technology also comes complexity and risk. Accountants need to adapt and develop new skills to manage these technological changes such as data analytics, automation and cyber security.

While there are many new technology capabilities that have broad application across the business and consumer environment, four trends have the greatest potential to transform the accountancy profession: **A**rtificial intelligence, **B**lockchain, **C**yber security and **D**ata (ABCD of technology).

These and other innovations are likely to have a significant impact on the way that accountants access, move and manage business finances. Technology can provide information more quickly and often more accurately than humans, but it cannot replicate human intelligence and quality decision making. Therefore, chartered accountants hold a key role in data analytics, in validating the source of the data, interpreting and analysing the outputs. Technology provides opportunities for chartered accountants to use their professional skills to add value to their clients and/or the businesses in which they work.

As routine and compliance work reduces, there is greater focus on the development of skills which equip professionals to work with the outputs of automated processes, with other specialists, and in a changing world.

We believe that skills such as analysis, interpretation, professional scepticism, communication, collaboration, adaptability, resilience, and commerciality are essential for tomorrow's business leaders; these are imbedded throughout the ACA exams and professional development framework.

THE ACA QUALIFICATION AND ETHICS

Culture and values are central to long-term success. How a business adopts an ethical approach towards its staff, shareholders, customers and regulators, as well as within its own operations, has a bigger impact than any performance measure or operational improvement.

Demonstrating a clear commitment to ethical behaviour is one of the main drivers of better performance; it delivers an advantage when recruiting, it adds value to a brand, and it instils trust and confidence in partners, suppliers and others that the organisation is well run and resilient.

Achieving that is not a matter of simple knowledge. Few ethical challenges will have simple right and wrong responses. They require technical understanding, rigorous appraisal and skilful handling. Accountants must have the necessary skills to apply professional judgement in a given situation, taking into account what has been learned as an ACA student about their ethical responsibilities as a Chartered Accountant.

There will be unique ethical challenges throughout any Chartered Accountant's process of learning and career. They serve a variety of masters: senior management, external stakeholders, regulators; and above all the public interest responsibility of their profession. Because of the rigorous and effective training (and continued professional development) chartered accountants can speak up and take a lead.

None of this can happen without one critical element: professionalism. That goes beyond merely knowing the Code of Ethics: it means embodying the right behaviours and having the ability and willingness to push back against those who might compromise the integrity of the business.

That confidence comes from a qualification that prioritises not only technical knowledge of the ethical framework but also challenges accountants with scenarios that accurately reflect the ethical dilemmas a Chartered Accountant may face in business.

ACA components

PROFESSIONAL DEVELOPMENT

ICAEW Chartered Accountants are known for their professionalism and expertise. Professional development prepares students to successfully handle a variety of different situations that they encounter throughout their career. The ACA qualification improves students' ability and performance in seven key areas:

- Adding value - add value to the organisation, team or role in order to achieve objectives
- Communication - communicate effectively at all levels, using oral, written and presentational skills to achieve positive outcomes
- Decision making - gather, interpret and evaluate data to make effective decisions
- Ethics and professionalism - behave ethically and sustainably while respecting others to uphold the values of the organisation and the accountancy profession
- Problem solving - analyse a problem, generate options and make recommendations to arrive at appropriate solutions
- Teamwork - work collaboratively as a member or leader of a team to achieve shared goals
- Technical competence - seek, learn and use technology and technical information to support the achievement of organisation or team goals

ETHICS AND PROFESSIONAL SCEPTICISM

Ethics is more than just knowing the rules around integrity, objectivity, professional competence and due care, confidentiality and professional behaviour. It's about identifying ethical dilemmas, understanding the implications, making judgements and behaving appropriately as well as using professional scepticism to build business trust. We integrate ethics throughout the ACA qualification to develop students' ethical capabilities to make suitable decisions. We embed ethics into the ACA and develop students' ethical capabilities in three ways:

1. **ICAEW Code of Ethics** - this online programme gives students a fundamental underpinning in ethics. It ensures knowledge of the ICAEW Code of Ethics, its fundamental principles and the ability to apply safeguards to ethical threats. It encourages questioning and engaging ethical thinking in a wide range of applications.
2. **Integration of ethical issues into all 15 ACA exams** - students are assessed on their understanding of, and reaction to, ethical dilemmas within the context of the subject matter of each module. Progression is made from identification of issues to judgements on perspectives, conflicts and responsibilities.
3. **Practical application** - having learnt the ethical principles and requirements via the Ethics Learning Programme, applying them in context within the ACA exams, students develop and apply ethical skills and behaviours within their daily work experience supported by their regular employer reviews and the professional development framework.

Professional scepticism is a key professional skill that supports effective decision making. Chartered Accountants must take an enquiring, questioning approach, not always accepting information at face value. We embed the requirement to apply professional scepticism within exam questions; students can expect to have to apply this skill in one or more of the following ways:

- Obtain and understand information relevant for making reliable judgements based on facts and circumstances known to them
- Make informed challenges of views developed by others

- Be sensitive to the integrity of information, including the source of information and the appropriateness of its presentation
- Withhold judgement pending thoughtful consideration of all known and relevant available information
- Be alert to potential bias or other impediments to the proper exercise of professional judgement

THREE TO FIVE YEARS' PRACTICAL WORK EXPERIENCE

Practical work experience is done as part of a training agreement with an authorised training employer or principal. Students need to complete 450 days, which normally takes between three and five years. The knowledge, skills and experience they gain as part of their training are invaluable, giving them the opportunity to put what they're learning into practice. Experience can be completed in at least one of the following six categories:

1. Accounting
2. Audit and assurance (audit is not compulsory)
3. Financial management
4. Information technology
5. Insolvency
6. Taxation

Student practical work experience should:

- include responsibility levels that increase in depth and scope as the student progresses through their training;
- be recorded throughout their training agreement; and
- expose them to as many different practical assignments, finance functions and/or clients in as many different sectors as possible.

15 ACCOUNTANCY, FINANCE AND BUSINESS EXAMS

Students gain in-depth knowledge across a broad range of topics in accountancy, finance and business. The exams are designed to complement their practical work experience, so they constantly progress through the qualification.

There are 15 exams over three levels - Certificate, Professional and Advanced. They can be taken in any order, except for the Case Study which has to be attempted last, within the final year of an ACA training agreement and once all other exams have been taken or received credit.

CERTIFICATE LEVEL

There are six exams at this level that introduce the fundamentals of accountancy, finance and business. Students may be eligible for credit for some exams if they have studied a qualification we recognise. Find out more at [icaew.com/cpl](https://www.icaew.com/cpl).

The Certificate Level exams are each 1.5 hours long, have a 55% pass mark, and can be sat throughout the year.

PROFESSIONAL LEVEL

The next six exams build on the fundamentals and test students' understanding and ability to use technical knowledge in real-life scenarios. The exams can be taken in March, June, September and December. Please note, the Business Planning alternative exams for banking and insurance are available at the June, September and December sittings.

The Professional Level exams are 2.5 hours long, except for Financial Accounting and Reporting which is 3 hours long. Each exam has a 55% pass mark.

Prescribed texts are permitted for Audit and Assurance, Finance Accounting and Reporting and Tax Compliance, with the Business Planning exams being open book.

The Professional Level exams are flexible and can be taken in any order to fit with a student's

day-to-day work. The Business Planning and Business Strategy and Technology exams in particular help students to progress to the Advanced Level.

Alternative exams are available for the Business Planning and Financial Accounting and Reporting modules.

The Business Planning exams provide students with the opportunity to gain subject- and sector-specific knowledge while studying for the ACA. The suite of Business Planning exams is based on the same syllabus structure and skills frameworks, and will give students the opportunity to demonstrate their learning and use this in the context of taxation, banking or insurance. There are three to choose from - Business Planning: Taxation, Business Planning: Banking, and Business Planning: Insurance. Students will need to sit one of the Business Planning exams.

Alternative financial reporting exams are also available for Financial Accounting and Reporting. Students can choose between two different contexts, either UK GAAP or IFRS Standards. This means that students can study the financial reporting framework most beneficial to their employer and clients. Students will need to sit one version of the Financial Accounting and Reporting exam.

ADVANCED LEVEL

The Corporate Reporting and Strategic Business Management exams test students' understanding and strategic decision-making at a senior level. They present real-life scenarios, with increased complexity and implications from the Professional Level exams.

The Case Study tests all the knowledge, skills and experience gained so far. It presents a complex business issue which challenges students' ability to problem solve, identify the ethical implications and provide an effective solution.

The Advanced Level exams can be taken in July and November. They are fully open book, so they replicate a real-life scenario where all the resources are at their fingertips.

The Corporate Reporting and Strategic Business Management exams are 3.5 hours long. The Case Study exam is 4 hours long. Each has a 50% pass mark.

An authorised training employer or principal will guide their students on the exams which are right for them. If a student is studying the ACA independently, they should consider their future ambitions when selecting which exams to sit.

For more information, guidance and support on exams, visit the exam resources area on our website at [icaew.com/cbe](https://www.icaew.com/cbe).

FLEXIBILITY

There are no regulations stipulating the order in which students must attempt the exams, allowing employers to design training programmes according to business needs. The exception to this rule is the Case Study, which must be the last exam attempted and when a student has entered their final year of training.

Students will be permitted a maximum of four attempts at each Certificate and Professional Level exam, and unlimited attempts at the Advanced Level exams.

CREDIT FOR PRIOR LEARNING (CPL)

Students with previous qualifications may be eligible to apply for CPL for up to 12 modules at the Certificate and Professional Levels. CPL is not available at the Advanced Level. For more information, visit [icaew.com/cpl](https://www.icaew.com/cpl).

PERMITTED TEXTS

For some Professional Level exams, students are permitted to use certain publications during the exam.

The Professional Level Business Planning exams and Advanced Level exams are open book, so students can use any material and texts during their exam. Students will have access to their personal ICAEW Bookshelf, containing their copies of the digital learning materials, including any highlights and notes that they have made during their study. Students may also take in any hard copy materials, subject to practical space restrictions.

Details of the specific permitted texts, and how materials can be accessed within exams can be found at [icaew.com/permittedtexts](https://www.icaew.com/permittedtexts).

DATA ANALYTICS SOFTWARE

Chartered Accountants are increasingly using more advanced approaches to interrogate client data. To respond to this, ICAEW has incorporated data analytics software within the Audit and Assurance and Corporate Reporting modules. Embedding data analytic techniques within our exams ensures that we continue to reflect the current and future workplace and will also help to develop students' judgement, professional scepticism and critical thinking skills.

In the Audit and Assurance and Corporate Reporting exams, students will be provided with a dataset including thousands of transactions. They will be expected to use their data analytic skills to interrogate the data and identify areas of concern or items which warrant further investigation.

Skills progression through the ACA exams

The complete set of professional skills that ICAEW Chartered Accountants are required to develop during their training are detailed in the seven key areas of skills covered in the previous section on professional development. A subsection of these skills are embedded in the 15 modules and assessed in exams. The following skills are present throughout the 15 accountancy, finance and business modules:

SKILL		OVERALL
Assimilating and using information		Understand a business or accounting situation, prioritise by determining key drivers, issues and requirements and identify any relevant information.
Structuring problems and solutions		Structure information from various sources into suitable formats for analysis and provide creative and pragmatic solutions in a business environment.
Applying judgement		Apply professional scepticism and critical thinking to identify faults, gaps, inconsistencies and interactions from a range of relevant information sources and relate issues to a business environment.
Concluding, recommending and communicating		Apply technical knowledge, skills and experience to support reasoning and conclusion and formulate opinions, advice, plans, solutions, options and reservations based on valid evidence and communicate clearer in a manner suitable for the recipient.

The level of skill required to pass each exam increases as ACA trainees progress upwards through each Level of the ACA qualification. The skills progression embedded throughout the ACA qualification ensures ACA trainees develop the knowledge and skills to successfully operate in the modern workplace and which are expected by today's forward thinking employers.

Skills	Certificate Level		Professional Level		Advanced Level	
	Assurance, Business, Technology & Finance, Law	Principles of Taxation, Management Information, Accounting	Financial Accounting & Reporting, Audit & Assurance, Financial Management, Tax Compliance	Business Planning and Business Strategy & Technology	Corporate Reporting and Strategic Business Management	Case Study

Assimilating and using information

Understanding the situation and the requirements	Objective testing	Objective testing and simple scenarios	Scenarios		Complex scenarios	Unstructured complex business scenarios
Identifying and using relevant information	Information as provided		Single information source provided	Several information sources provided	Multiple information sources provided	Multiple information sources including own research
Identifying and prioritising key issues	Issues given		Issues included in scenarios		Issues included in complex scenarios	Issues included in unstructured complex scenarios

Structuring problems and solutions

Structuring data	Specified techniques		Specified techniques	Techniques inferred by nature of problem	Techniques inferred by nature of problem	Unspecified techniques
Developing solutions	Highly specified tasks	Specified problems	Specified problems		Specified and implicit problems	Defined output but unspecified problems

Applying judgement

Applying professional scepticism and critical thinking	Objective testing		Specified requirement in simple scenario	Specified requirement in scenario	Specified requirement in complex scenario	Underlying requirement within complex scenario
Relating issues to the broader business environment, including ethical issues	Objective testing	Objective testing and Issues in simple scenarios	Issues in scenarios		Issues in complex scenarios	Issues in complex, unstructured scenarios

Concluding, recommending and communicating

Concluding and recommending	Objective testing	Not assessed	Specified conclusions and recommendations in simple scenarios		Specified conclusions and reasoned recommendations in complex scenarios	Conclusions and recommendations supported by own evidence
Communicating	Prescribed exam format		Exam requirements, including some professional presentation		Professional presentations including reasoned recommendations	Professional report with appendices

PROFESSIONAL SKILLS ASSESSED IN THE ACA EXAMS

ASSIMILATING AND USING INFORMATION

Understand the situation and the requirements	Identify and use relevant information	Identify and prioritise key issues and stay on task
<ul style="list-style-type: none"> • Demonstrate understanding of the business context • Recognise new and complex ideas within a scenario • Identify the needs of customers and clients • Explain different stakeholder perspectives and interests • Identify risks within a scenario • Identify elements of uncertainty within a scenario • Identify ethical issues including public interest and sustainability issues within a scenario 	<ul style="list-style-type: none"> • Interpret information provided in various formats • Evaluate the relevance of information provided • Use multiple information sources • Filter information provided to identify critical facts 	<ul style="list-style-type: none"> • Identify business and financial issues from a scenario • Prioritise key issues • Work effectively within time constraints • Operate to a brief in a given scenario

STRUCTURING PROBLEMS AND SOLUTIONS

Structure data	Develop solutions
<ul style="list-style-type: none"> • Structure information from various sources into suitable formats for analysis • Identify any information gaps • Frame questions to clarify information • Use a range of data types and sources to inform analysis and decision-making • Structure and analyse financial and non-financial data to enhance understanding of business issues and their underlying causes • Present analysis in accordance with instructions and criteria 	<ul style="list-style-type: none"> • Identify and apply relevant technical knowledge and skills to analyse a specific problem • Use structured information to identify evidence-based solutions • Identify creative and pragmatic solutions in a business environment • Identify opportunities to add value • Identify and anticipate problems that may result from a decision • Identify a range of possible solutions based on analysis • Identify ethical dimensions of possible solutions • Select appropriate courses of action using an ethical framework • Identify the solution which is the best fit with acceptance criteria and objectives • Define objectives and acceptance criteria for solutions

APPLYING JUDGEMENT

Apply professional scepticism and critical thinking	Relate issues to the environment
<ul style="list-style-type: none"> • Recognise bias and varying quality in data and evidence • Identify assumptions or faults in arguments • Identify gaps in evidence • Identify inconsistencies and contradictory information • Assess interaction of information from different sources • Exercise ethical judgement 	<ul style="list-style-type: none"> • Appreciate when more expert help is required • Identify related issues in scenarios • Assess different stakeholder perspectives when evaluating options • Retain an overview of the business issue or scenario • Appraise corporate responsibility and sustainability issues • Appraise the effects of alternative future scenarios • Appraise ethical, public interest and regulatory issues

CONCLUDING, RECOMMENDING AND COMMUNICATING

Conclusions	Recommendations	Communication
<ul style="list-style-type: none"> • Apply technical knowledge to support reasoning and conclusions • Apply professional experience and evidence to support reasoning • Use valid and different technical skills to formulate opinions, advice, plans, solutions, options and reservations 	<ul style="list-style-type: none"> • Present recommendations in accordance with instructions and defined criteria • Make recommendations in situations where risks and uncertainty exist • Formulate opinions, advice, recommendations, plans, solutions, options and reservations based on valid evidence • Make evidence-based recommendations which can be justified by reference to supporting data and other information • Develop recommendations which combine different technical skills in a practical situation 	<ul style="list-style-type: none"> • Present a basic or routine memorandum or briefing note in writing in a clear and concise style • Present analysis and recommendations in accordance with instructions • Communicate clearly to a specialist or non-specialist audience in a manner suitable for the recipient • Prepare the advice, report, or notes required in a clear and concise style

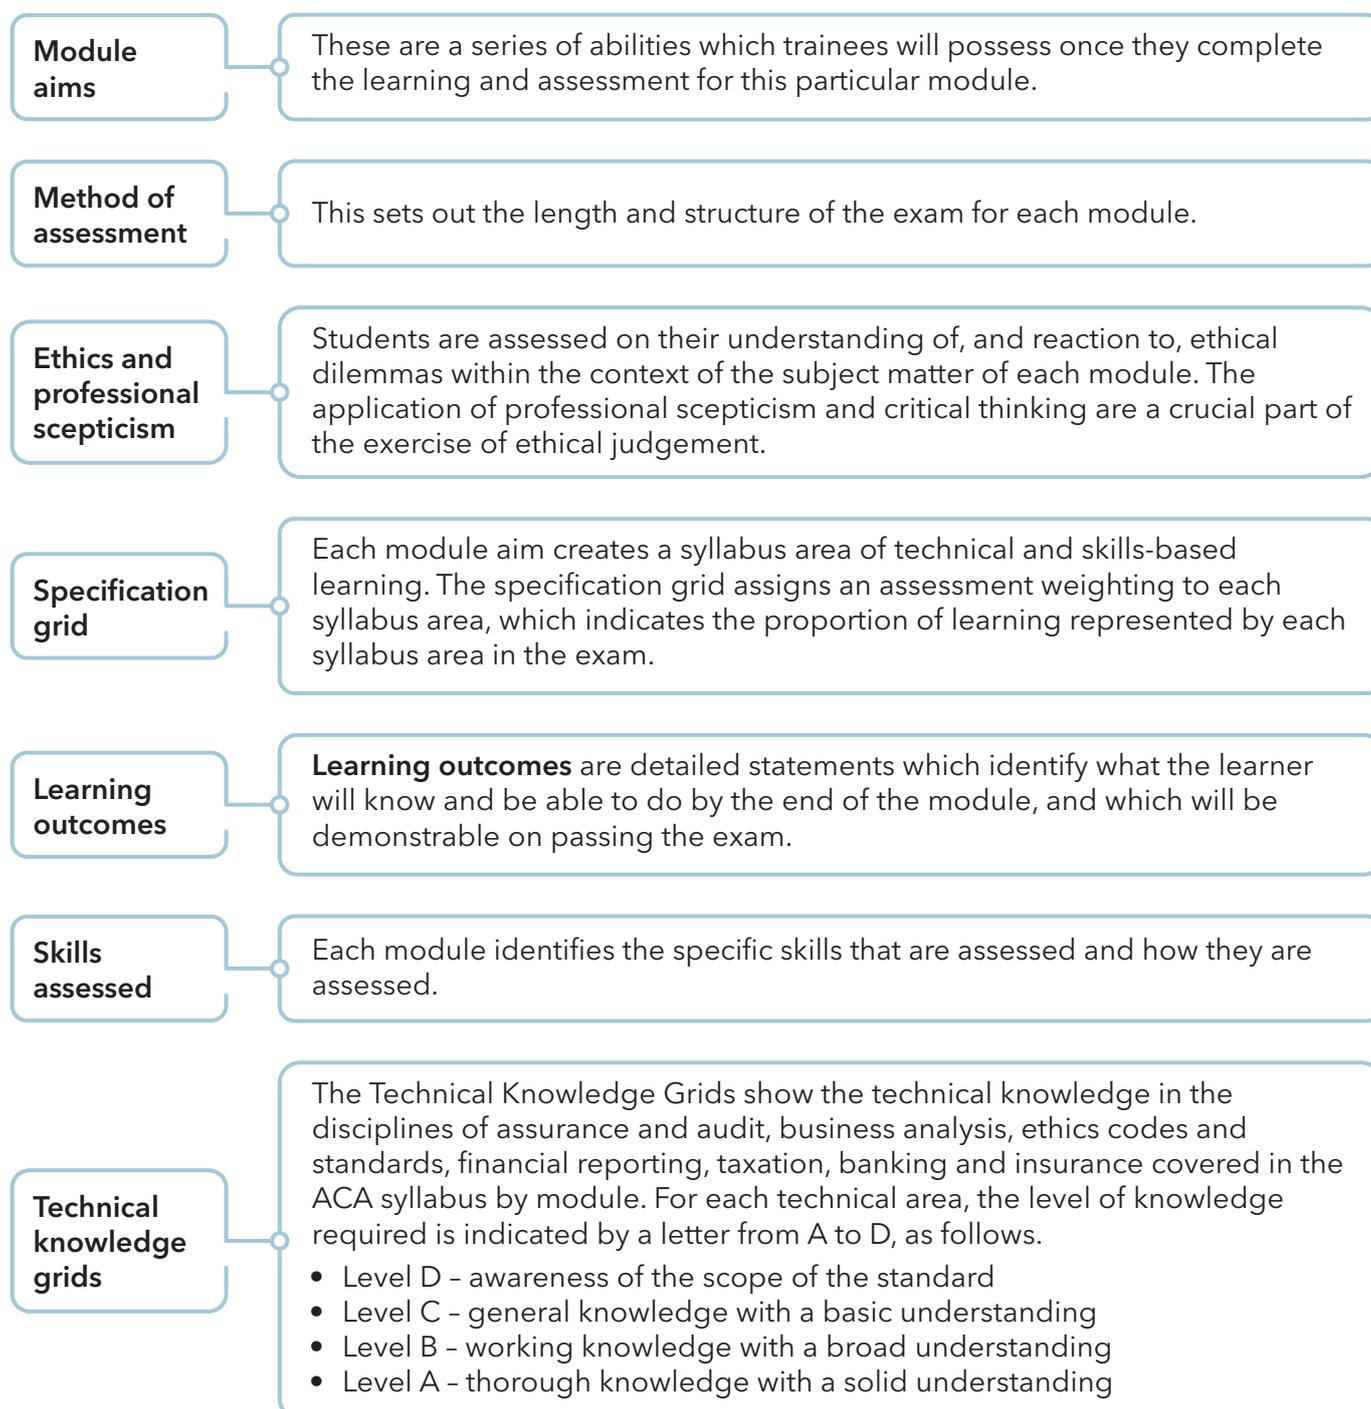

ACA Syllabus

The ACA syllabus is updated annually. The aim of the annual update is to ensure that the syllabus remains fit for purpose and can include amendments to cater for technical changes, clarification of learning outcomes, and inclusion of new areas of knowledge impacting ICAEW Chartered Accountants. The process includes consultation with all key stakeholder groups and covers the skills, learning outcomes, and technical knowledge grids of each module.

This document presents the learning outcomes for each of the ACA exams. The learning outcomes in each exam should be read in conjunction with the relevant technical knowledge grids and, where applicable, the skills development grid.

UNDERSTANDING THE SYLLABUS FOR EACH MODULE

Each module has the following syllabus components:

Professional Level

Business Planning

The Business Planning modules provide students with the opportunity to gain subject- and sector-specific knowledge while studying for the ACA. Students will sit one of the Business Planning modules. There are three to choose from – Business Planning: Taxation, Business Planning: Banking, and Business Planning: Insurance.

Business Planning: Taxation

MODULE AIM

To enable students to apply technical knowledge and professional skills to identify and resolve taxation issues that arise in the context of preparing tax computations and to advise on tax-efficient strategies for businesses and individuals.

Students will be required to use technical knowledge and professional judgement to identify, explain and evaluate alternative tax treatments and to determine the appropriate solutions to taxation issues, giving due consideration to the needs of clients and the interaction between taxes. The commercial context and impact of recommendations will need to be considered in making such judgements, as will ethical and legal issues.

PRIOR KNOWLEDGE

There are no regulations stipulating the order in which students must attempt this module. However, students are strongly advised to complete both the Principles of Taxation module and the Tax Compliance module before attempting this module, as the ability to prepare tax computations is required to be successful at this module.

Although technical topics by necessity flow through the three tax exams, a technical topic will not usually be retested in this module in a comprehensive computational question if it has already been tested in detail in either of the other two tax exams.

METHOD OF ASSESSMENT

The Business Planning: Taxation exam is 2.5 hours long. The exam will contain questions requiring the use of communication, judgement and evaluation skills as well as an ability to understand the interaction of different taxes.

The exam will consist of three questions. One question will be an integrated scenario of approximately 40 marks. All three questions may cover a range of taxes as well as including tax planning. Ethics and law may be tested in any of the three questions.

The exam will be open book. Students will be able to access their personal ICAEW Bookshelf and any ICAEW digital learning materials held there, during the exam. Students will also be permitted to take any written or printed material into the exam, subject to practical space restrictions. To see the recommended text(s) for this exam, go to [icaew.com/permitteditexts](https://www.icaew.com/permitteditexts).

ETHICS AND PROFESSIONAL SCEPTICISM

It is imperative that ethical issues are prioritised in the planning of business taxation. Students will be expected to apply the ICAEW Code of Ethics and Professional Conduct in Relation to Taxation across all of the questions in the exam. Students will be required to recognise and explain key ethical issues, identify ethical dimensions of possible scenarios, make appropriate judgements being mindful of professional scepticism and make recommendations in a sound and trustworthy manner.

SPECIFICATION GRID

This grid provides a general guide as to the subject matter within this module and assessment coverage over a period of time.

SYLLABUS AREA	WEIGHTING
Ethics and law	5-10%
Taxation of corporate entities	35-45%
Taxation of owner-managed businesses	20-30%
Personal taxation	15-25%

This grid provides guidance on the relative weighting between knowledge and skills:

	WEIGHTING
Knowledge	25-35%
Skills	65-75%

The following learning outcomes should be read in conjunction with the relevant sections of the technical knowledge grids at the end of this document.

1 ADVANCED TAXATION

Students will be able to analyse, evaluate and calculate the tax consequences of actions for individuals and companies and evaluate the interaction of taxes in given scenarios. This will involve advising and assisting clients in adhering to tax regulations.

In the assessment students may be required to consider:

TAXATION OF BUSINESS AND CORPORATE ENTITIES

- determine, explain and calculate the tax liabilities for individuals and corporate entities, including income tax, national insurance, corporation tax, diverted profits tax, stamp taxes, VAT, and annual tax on enveloped dwellings (ATED);
- evaluate the tax implications of the choice of business structures, including provision of services through a company;
- explain the taxation issues relating to business start-ups;
- identify and evaluate the impact of close companies on the taxation of companies and individuals;
- explain and evaluate the tax implications of group structures;
- apply, explain and evaluate issues relating to transfer pricing;

- explain and evaluate the tax implications of business transformations and change;
- explain and calculate the tax implications involved in the cessation of trade;

INTERNATIONAL ASPECTS OF CORPORATE TAXATION

- calculate the impact of international expansion on UK tax liabilities;
- explain the tax implications of inward investment in the UK;
- recognise the implications of double tax treaties, the OECD Model Tax Convention, and the OECD BEPS Project;
- apply and advise on double taxation relief;

FINANCING AND INVESTING

- evaluate the taxation implications of financing existing and new businesses;
- evaluate the taxation implications of returns to investors;
- advise and calculate the impact of tax efficient schemes including ISAs, enterprise investment schemes, seed enterprise investment schemes and venture capital trusts;

EMPLOYMENT INCOME AND REMUNERATION PACKAGES

- advise on the tax implications of remuneration packages including share

schemes, termination payments, and allowable deductions;

PERSONAL TAXATION AND OVERSEAS TAXATION

- q. calculate tax liabilities for individuals including income and capital gains tax, national insurance contributions and inheritance tax;
- r. advise on the taxation of foreign assets, income and gains;
- s. evaluate and advise on the impact of residence, non-residence, deemed domicile and domicile on an individual's tax liabilities;
- t. analyse and explain the implications of individuals leaving and coming to the UK as well as the special tax position for non-UK domiciled individuals;
- u. explain the implications of domicile and deemed domicile for inheritance tax;

TRUSTS

- v. identify the need for and advise on the use of trusts in tax planning; and
- w. appreciate and calculate, in straight forward scenarios, the tax implications of creating and using trusts and the tax implications of assets entering or leaving trusts.

2 TAX PLANNING

Students will be able to advise on alternative tax treatments to defer or minimise tax liabilities. Students will also be able to understand the interaction of taxes in given scenarios and to identify and discriminate between tax evasion and tax avoidance.

In the assessment students may be required to:

- a. identify legitimate tax planning measures to minimise tax liabilities;
- b. evaluate and advise on tax strategies to meet business objectives;
- c. evaluate and advise on alternative tax strategies relating to corporate transformations;
- d. recognise the significance for tax purposes of changes in an individual's circumstances such as marriage, divorce and death;
- e. recognise, explain and communicate opportunities to use alternative tax treatments arising from past transactions; and

- f. identify and communicate ethical and professional issues in giving tax planning advice.

3 ETHICS AND LAW

Students will be able to recognise and explain ethical and legal issues arising in taxation scenarios. Where ethical dilemmas arise, students will be required to apply the five fundamental principles and guidance in the IESBA and ICAEW codes as well as other relevant guidance, including the Professional Conduct in Relation to Taxation (PCRT), to recommend and justify appropriate, legal actions.

In the assessment, students may be required to, in the context of taxation:

- a. recognise and explain the relevance, importance and consequences of ethical and legal issues;
- b. recommend and justify appropriate actions where ethical dilemmas arise in a given scenario;
- c. design and evaluate appropriate ethical safeguards; and
- d. recognise and advise when a tax-avoidance scheme is notifiable to HMRC and distinguish between planning, avoidance and evasion and their consequences.

SKILLS ASSESSED

ASSIMILATING AND USING INFORMATION

Understand the situation and the requirements	Identify and use relevant information	Identify and prioritise key issues and stay on task
<ul style="list-style-type: none">• Demonstrate understanding of the business context• Recognise new and complex ideas within a scenario• Identify the needs of customers and clients• Identify risks within a scenario• Identify elements of uncertainty within a scenario• Identify ethical issues including public interest and sustainability issues within a scenario	<ul style="list-style-type: none">• Interpret information provided in various formats• Evaluate the relevance of information provided• Filter information provided to identify critical facts	<ul style="list-style-type: none">• Identify business and financial issues from a scenario• Prioritise key issues• Work effectively within time constraints• Operate to a brief in a given scenario

HOW SKILLS ARE ASSESSED:

students may be required to:

- assimilate information provided by internal and external sources;
- identify and evaluate inconsistencies in information provided from multiple sources; and
- recognise and explain key ethical issues for an accountant undertaking work in taxation.

STRUCTURING PROBLEMS AND SOLUTIONS

Structure data	Develop solutions
<ul style="list-style-type: none">• Structure information from various sources into suitable formats for analysis• Identify any information gaps• Frame questions to clarify information• Use a range of data types and sources to inform analysis and decision-making• Present analysis in accordance with instructions and criteria	<ul style="list-style-type: none">• Identify and apply relevant technical knowledge and skills to analyse a specific problem• Use structured information to identify evidence-based solutions• Identify creative and pragmatic solutions in a business environment• Identify opportunities to add value• Identify and anticipate problems that may result from a decision• Identify a range of possible solutions based on analysis• Identify ethical dimensions of possible solutions• Select appropriate courses of action using an ethical framework• Identify the solution which is the best fit with acceptance criteria and objectives• Define objectives and acceptance criteria for solutions

HOW SKILLS ARE ASSESSED:

students may be required to:

- consider and calculate a range of appropriate tax treatments;
 - provide descriptive analysis and explanations;
 - integrate different taxes and jurisdictions;
 - evaluate taxation impact of a transaction;
 - integrate descriptions with calculations in a form appropriate for the user;
 - apply technical knowledge to perform relevant, accurate calculations in a logically structured way;
 - identify further information or clarify existing arrangements with a client;
 - consider the impact of delaying or modifying future decisions; and
 - identify and explain ethical and legal issues.
-

APPLYING JUDGEMENT

Apply professional scepticism and critical thinking	Relate issues to the environment
<ul style="list-style-type: none">• Recognise bias and varying quality in data and evidence• Identify faults in arguments• Identify gaps in evidence• Identify inconsistencies and contradictory information• Assess interaction of information from different sources• Exercise ethical judgement	<ul style="list-style-type: none">• Appreciate when more expert help is required• Identify related issues in scenarios• Assess different stakeholder perspectives when evaluating options• Appraise the effects of alternative future scenarios• Appraise ethical, public interest and regulatory issues

HOW SKILLS ARE ASSESSED:

students may be required to:

- apply scepticism to the integrity of information provided in the scenario having regard to its source;
 - select between appropriate options;
 - identify omissions in the information;
 - evaluate inconsistencies in information;
 - evaluate the effects of future events;
 - identify key linkages between information provided in a scenario and possible tax treatments;
 - compare the effects of a range of estimates, outcomes or tax treatments; and
 - exercise own ethical judgement in assessing the consequences of various courses of action.
-

CONCLUDING, RECOMMENDING AND COMMUNICATING

Conclusions	Recommendations	Communication
<ul style="list-style-type: none">• Apply technical knowledge to support reasoning and conclusions• Apply technical knowledge, professional experience and evidence to support reasoning• Use valid and different technical skills to formulate opinions, advice, plans, solutions, options and reservations	<ul style="list-style-type: none">• Present recommendations in accordance with instructions and defined criteria• Make recommendations in situations where risks and uncertainty exist• Formulate opinions, advice, recommendations, plans, solutions, options and reservations based on valid evidence• Make evidence-based recommendations which can be justified by reference to supporting data and other information• Develop recommendations which combine different technical skills in a practical situation	<ul style="list-style-type: none">• Present a basic or routine memorandum or briefing note in writing in a clear and concise style• Present analysis and recommendations in accordance with instructions• Communicate clearly to a specialist or non-specialist audience in a manner suitable for the recipient• Prepare the advice, report, or notes required in a clear and concise style

HOW SKILLS ARE ASSESSED:

students may be required to:

- determine the tax implications of scenarios and proposals to provide alternative recommendations to meet a given individual or corporate objective or goal;
- formulate and recommend a reasoned conclusion from structured calculations;
- justify a conclusion made using knowledge of the existing tax regime;
- advise on the ethical considerations;
- explain the limitations of conclusions or recommendations;
- present a report/memorandum in response to a specific technical or ethical issue and in accordance with client requirements;
- present a review of advice or proposed tax strategies making recommendations supported by calculations or analysis of tax issues identified;
- present a justification of a specific recommended action when a variety of options are available;
- identify further information required to complete tax computations and finalise tax advice; and
- give advice which is appropriate, technically correct, and within the law and the ICAEW Code of Ethics as well as other relevant guidance, including the Professional Conduct in Relation to Taxation (PCRT).

Technical knowledge

The tables contained in this section show the technical knowledge in the disciplines of financial reporting, audit and assurance, business analysis, ethics and taxation covered in the ACA syllabus by module.

For each individual standard the level of knowledge required in the relevant Certificate and Professional Level module and at the Advanced Level is shown.

The knowledge levels are defined as follows:

LEVEL D

An awareness of the scope of the standard.

LEVEL C

A general knowledge with a basic understanding of the subject matter and training in its application thereof sufficient to identify significant issues and evaluate their potential implications or impact.

LEVEL B

A working knowledge with a broad understanding of the subject matter and a level of experience in the application thereof sufficient to apply the subject matter in straightforward circumstances.

LEVEL A

A thorough knowledge with a solid understanding of the subject matter and experience in the application thereof sufficient to exercise reasonable professional judgement in the application of the subject matter in those circumstances generally encountered by chartered accountants.

KEY TO OTHER SYMBOLS:

→ The knowledge level reached is assumed to be continued
