Professional Level.....	10
Tax Compliance.....	10
Technical Knowledge Grids.....	16

ACA overview

The ICAEW chartered accountancy qualification, the ACA, is one of the most advanced learning and professional development programmes available. Its integrated components provide an in-depth understanding across accountancy, finance and business. Combined, they help build the technical knowledge, professional skills and practical experience needed to become an ICAEW Chartered Accountant.

Each component is designed to complement each other, which means that students can put theory into practice and can understand and apply what they learn to their day-to-day work. The components are:

- Professional development
- Ethics and professional scepticism
- Three to five years practical work experience
- 15 accountancy, finance and business exams

PROFESSIONAL DEVELOPMENT

ICAEW Chartered Accountants are known for their professionalism and expertise. Professional development prepares students to successfully handle a variety of different situations that they encounter throughout their career. The ACA qualification improves students' ability and performance in seven key areas:

- adding value
- communication
- decision making
- ethics and professionalism
- problem solving
- teamwork
- technical competence.

ETHICS AND PROFESSIONAL SCEPTICISM

Ethics is more than just knowing the rules around confidentiality, integrity, objectivity and independence. It's about identifying ethical dilemmas, understanding the implications and behaving appropriately. We integrate ethics throughout the ACA qualification to develop students' ethical capabilities – so they will always know how to make the right decisions and justify them.

THREE TO FIVE YEARS' PRACTICAL WORK EXPERIENCE

Practical work experience is done as part of a training agreement with an authorised training employer or principal. Students need to complete 450 days, which normally takes between three and five years. The knowledge, skills and experience they gain as part of their training agreement are invaluable, giving them the opportunity to put what they're learning into practice. Experience can be completed in at least one of the following six categories:

1. Accounting
2. Audit and assurance (audit is not compulsory)
3. Financial management
4. Information technology
5. Insolvency
6. Taxation.
- 7.

15 ACCOUNTANCY, FINANCE AND BUSINESS EXAMS

Students gain in-depth knowledge across a broad range of topics in accountancy, finance and business. The exams are designed to complement their practical work experience, so they constantly progress through the qualification.

There are 15 exams over three levels – Certificate, Professional and Advanced. They can be taken in any order with the exception of the Case Study which has to be attempted last, within the final year of an ACA training agreement and once all other exams have been taken or received credit.

CERTIFICATE LEVEL

There are six exams at this level that introduce the fundamentals of accountancy, finance and business. Students may be eligible for credit for some exams if they have studied a qualification we recognise. Find out more at icaew.com/cpl.

These six exams are also available as a stand-alone certificate, the ICAEW Certificate in Finance, Accounting and Business (ICAEW CFAB) and as part of the ICAEW Level 4 Trailblazer in Accountancy. ICAEW CFAB and our apprenticeship can serve as stepping stones to the ACA qualification.

PROFESSIONAL LEVEL

The next six exams build on the fundamentals and test students' understanding and ability to use technical knowledge in real-life scenarios. The exams can be taken in March, June, September and December. Please note, the Business Planning alternative exams for banking and insurance are available at the June, September and December sittings.

Prescribed texts are permitted for Audit and Assurance, Finance Accounting and Reporting and Tax Compliance, with open books permitted for the Business Planning exams.

The Professional Level exams are flexible and can be taken in any order to fit with a student's day-to-day work. The Business Planning and Business Strategy and Technology exams in particular help students to progress to the Advanced Level.

Alternative exams are available for the Business Planning and Financial Accounting and Reporting modules.

The Business Planning exams provide students with the opportunity to gain subject- and sector-specific knowledge while studying for the ACA. The suite of Business Planning exams are based on the same syllabus structure and skills frameworks, and will provide students with the opportunity to demonstrate their learning and use this in the context of taxation, banking or insurance. There are three to choose from – Business Planning: Taxation, Business Planning: Banking and Business Planning: Insurance. Students will need to sit one of the Business Planning exams.

Alternative financial reporting exams are also available for Financial Accounting and Reporting. Students can choose between two different contexts, either UK GAAP or IFRS. This means that students can study the financial reporting framework most beneficial to their employer and clients. Students will need to sit one version of the Financial Accounting and Reporting exam.

ADVANCED LEVEL

The Corporate Reporting and Strategic Business Management exams test students' understanding and strategic decision making at a senior level. They present real-life scenarios, with increased complexity and implications from the Professional Level exams.

The Case Study tests all the knowledge, skills and experience gained so far. It presents a complex business issue which challenges students' ability to problem solve, identify the ethical implications and provide an effective solution.

The Advanced Level exams can be taken in July and November. They are fully open book, so they replicate a real-life scenario where all the resources are at their fingertips.

An authorised training employer or principal will guide their students on the exams which are right for them. If a student is studying the ACA independently, they should consider their future ambitions when selecting which exams to sit.

SYLLABUS

This document presents the learning outcomes for each of the ACA exams. The learning outcomes in each exam should be read in conjunction with the relevant technical knowledge grids and, where applicable, the skills development grid.

ASSESSMENT

The six Certificate Level exams each have a 1.5 hour computer-based exam, a 55% pass mark, and can be sat throughout the year at an ICAEW-approved test centre.

The Professional Level exams are 2.5 hours long, except for Financial Accounting and Reporting which is 3 hours long. Each exam has a 55% pass mark. The Professional Level exams are examined using computer-based exams. The Audit and Assurance, Financial Accounting and Reporting, Financial Management and Tax Compliance exams moved to computer in 2017 and are no longer available as paper-based exams.

Business Planning: Taxation and Business Strategy and Technology will move to computer-based exams in March 2018, with Business Planning: Banking and Business Planning: Insurance moving to computer-based exams in June 2018.

From June 2018, all Professional Level exams will be computer-based.

The three Advanced Level modules are also examined using paper-based exams. The Corporate Reporting and Strategic Business Management exams are 3.5 hours long. The Case Study exam is 4 hours long. Each has a 50% pass mark.

For more information, guidance and support on the introduction of computer-based exams, visit the exam resources area on our website at icaew.com/cbe

FLEXIBILITY

There are no regulations stipulating the order in which students must attempt the exams, allowing employers to design training programmes according to business needs. The exception to this rule is the Case Study, which must be the last exam attempted and when a student has entered their final year of training.

Students will be permitted a maximum of four attempts at each Certificate and Professional Level exam, and unlimited attempts at the Advanced Level exams.

CREDIT FOR PRIOR LEARNING (CPL)

Students with previous qualifications may be eligible to apply for CPL for up to 12 modules at the Certificate and Professional Levels. CPL is not available at the Advanced Level. For more information, visit icaew.com/cpl

OPEN BOOK POLICY

For some Professional Level exams, students are permitted to take certain publications into the exam. Details of these publications and our open book policy can be found at icaew.com/permittedtexts

For the Professional Level Business Planning alternative exams, and at the Advanced Level, students are permitted to take any material into the exam, subject to practical space restrictions.

SKILLS PROGRESSION THROUGH THE ACA QUALIFICATION

Assessed skills	Certificate Level	Professional Level	Advanced Level	
			Corporate Reporting and Strategic Business Management	Case Study
Assimilating and using information				
Understanding the situation and the requirements	Objective testing	Simple scenarios	Complex scenarios	Unstructured complex business scenarios
Identifying and using relevant information	Information as provided	Single information source provided	Multiple information sources provided	Multiple information sources including own research
Identifying and prioritising key issues	Issues given	Issues included in simple scenarios	Issues included in complex scenarios	Issues included in unstructured complex scenarios
Structuring problems and solutions				
Structuring data	Specified techniques	Specified techniques	Techniques inferred by nature of problem	Unspecified techniques
Developing solutions	Highly specified tasks	Specified problems	Specified problems	Defined output but unspecified problems
Applying judgement				
Applying professional scepticism and critical thinking	Objective testing	Specified requirement in simple scenario	Specified requirement in complex scenario	Underlying requirement within complex scenario
Relating issues to the broader business environment, including ethical issues	Objective testing	Issues in simple scenarios	Issues in complex scenarios	Issues in complex, unstructured scenarios
Concluding, recommending and communicating				
Concluding and recommending	Not assessed	Specified conclusions and recommendations in simple scenarios	Specified conclusions and recommendations in complex scenarios	Conclusions and recommendations supported by own evidence
Communicating	Prescribed exam format	Exam requirements, including some professional presentation	Short written professional presentations	Professional report with appendices

PROFESSIONAL SKILLS ASSESSED IN THE ACA EXAMS

Assimilating and using information	<p>Understand the situation and the requirements Demonstrate understanding of the business context Recognise new and complex ideas within a scenario Identify the needs of customers and clients Explain different stakeholder perspectives and interests Identify risks within a scenario Identify elements of uncertainty within a scenario Identify ethical issues including public interest and sustainability issues within a scenario</p> <p>Identify and use relevant information Interpret information provided in various formats Evaluate the relevance of information provided Use multiple information sources Filter information provided to identify critical facts</p> <p>Identify and prioritise key issues and stay on task Identify business and financial issues from a scenario Prioritise key issues Work effectively within time constraints Operate to a brief in a given scenario</p>
Structuring problems and solutions	<p>Structure data Structure information from various sources into suitable formats for analysis Identify any information gaps Frame questions to clarify information Use a range of data types and sources to inform analysis and decision making Structure and analyse financial and non-financial data to enhance understanding of business issues and their underlying causes Present analysis in accordance with instructions and criteria</p> <p>Develop solutions Identify and apply relevant technical knowledge and skills to analyse a specific problem Use structured information to identify evidence-based solutions Identify creative and pragmatic solutions in a business environment Identify opportunities to add value</p>

	<p>Identify and anticipate problems that may result from a decision Identify a range of possible solutions based on analysis Identify ethical dimensions of possible solutions Select appropriate courses of action using an ethical framework Identify the solution which is the best fit with acceptance criteria and objectives Define objectives and acceptance criteria for solutions</p>
<p>Applying judgement</p>	<p>Apply professional scepticism and critical thinking Recognise bias and varying quality in data and evidence Identify assumptions or faults in arguments Identify gaps in evidence Identify inconsistencies and contradictory information Assess interaction of information from different sources Exercise ethical judgement</p> <p>Relate issues to the environment Appreciate when more expert help is required Identify related issues in scenarios Assess different stakeholder perspectives when evaluating options Retain an overview of the business issue or scenario Appraise corporate responsibility and sustainability issues Appraise the effects of alternative future scenarios Appraise ethical, public interest and regulatory issues</p>
<p>Concluding, recommending and communicating</p>	<p>Conclusions Apply technical knowledge to support reasoning and conclusions Apply professional experience and evidence to support reasoning Use valid and different technical skills to formulate opinions, advice, plans, solutions, options and reservations.</p> <p>Recommendations Present recommendations in accordance with instructions and defined criteria Make recommendations in situations where risks and uncertainty exist Formulate opinions, advice, recommendations, plans, solution, options and reservations based on valid evidence Make evidence-based recommendations which can be justified by reference to supporting data and other information Develop recommendations which combine different technical skills in a practical situation</p>

Communication

Present a basic or routine memorandum or briefing note in writing in a clear and concise style

Present analysis and recommendations in accordance with instructions

Communicate clearly to a specialist or non-specialist audience in a manner suitable for the recipient

Prepare the advice, report, or notes required in a clear and concise style

Professional Level Tax Compliance

MODULE AIM

To enable students to prepare tax computations for individuals and companies in straightforward scenarios.

On completion of this module, students will be able to:

- recognise the ethical issues arising in the course of performing tax work and identify the obligations the UK system of taxation imposes on taxpayers and the implications for taxpayers of non-compliance;
- calculate the amount of VAT owed by or owed to businesses;
- calculate the amount of stamp taxes due in straightforward transactions;
- calculate the capital gains tax payable by individuals and trustees;
- calculate the amounts of inheritance tax due on lifetime transfers and transfers on death by individuals, personal representatives and trustees;
- calculate the corporation tax liabilities of companies;
- calculate the amounts of income tax owed by or owed to individuals and trustees; and
- calculate the amounts of national insurance payable by individuals, businesses and companies.

TAXES COVERED IN THIS MODULE

Capital gains tax
Corporation tax
Income tax
Inheritance tax
National insurance
Stamp taxes
VAT

METHOD OF ASSESSMENT

The Tax Compliance module is assessed by a 2.5 hour computer-based exam.

The exam will test each of the taxes on the syllabus as a discrete topic. Students may use the permitted text(s) as detailed on the ICAEW website; icaew.com/permittedtexts.

The exam will consist of five questions.

SPECIFICATION GRID

This grid shows the relative weightings of subjects within this module and should guide the relative study time spent on each. Over time the marks available in the assessment will equate to the weightings below, while slight variations may occur in individual assessments to enable suitably rigorous questions to be set.

Syllabus area	Weighting (%)
1 Ethics and law	5-10
2 Indirect taxes	10-15
3 Capital taxes	20-30
4 Corporation tax	15-20
5 Income tax and NIC	35-45

This grid provides guidance on the relative weighting between knowledge and skills:

	Weighting (%)
Knowledge	65-75
Skills	25-35

The following learning outcomes should be read in conjunction with the relevant sections of the technical knowledge grids at the end of this document.

1 Ethics and law

Students will be able to recognise ethical issues arising in the course of performing tax work and identify the obligations the UK system of tax imposes on taxpayers and the implications for taxpayers of non-compliance.

In the assessment, students may be required to:

- a. identify the five fundamental principles and guidance given in the IESBA Code of Ethics for Professional Accountants and the ICAEW Code of Ethics as well as other relevant guidance, including Professional Conduct in Relation to Taxation (PCRT), in relation to a tax practice with regard to:
 - the threats and safeguards framework
 - disclosure of information
 - conflicts of interest
 - confidentiality;
- b. identify the law and the guidance in the ICAEW Code of Ethics as well as other relevant guidance, including Professional Conduct in Relation to Taxation (PCRT), with regard to:
 - new client procedures
 - regulatory requirements for tax practices
 - HMRC errors
 - money laundering
 - tax planning, tax avoidance and tax evasion;
- c. identify legal and ethical issues arising from tax work undertaken and explain the significance of these issues and suggest appropriate actions or responses;
- d. Identify the role of data analytics in reducing the tax gap.

2 Indirect taxes

Students will be able to calculate the amount of VAT owed by or owed to businesses and calculate the amount of stamp taxes due in straightforward transactions.

In the assessment, students may be required to:

- a. explain the VAT consequences of property transactions;
- b. explain the VAT consequences of group registration for VAT;
- c. explain the VAT consequences of the option to tax;
- d. explain and calculate the VAT consequences of the capital goods scheme;

- e. calculate the VAT due to or from HMRC for both wholly taxable and partially exempt traders;
- f. explain the VAT consequences of imports and exports of goods and services to and from VAT registered and non-VAT registered persons in the EU and overseas;
- g. explain the classification of supplies and the distinction between goods and services;
- h. identify and explain the differing VAT treatment of single and multiple supplies;
- i. identify common situations in which a liability to Stamp Duty Land Tax, Stamp Duty Reserve Tax, and Stamp Duty arises;
- j. identify situations where there is an exemption from stamp taxes; and
- k. calculate the amount of stamp taxes due in straightforward transactions.

3 Capital taxes

Students will be able to calculate the capital gains tax payable by individuals and trustees.

Students will also be able to calculate the amounts of inheritance tax due on lifetime transfers and transfers on death by individuals, personal representatives and trustees.

In the assessment, students may be required to:

- a. calculate the chargeable gains and losses on assets, including chattels, leases, and shares and securities;
- b. describe the circumstances in which the following reliefs apply and calculate the effect of full or partial relief available in a given situation:
 - letting relief
 - principal private residence relief
 - gift relief
 - rollover relief
 - entrepreneurs' relief;
- c. explain the impact of an individual's residence and domicile on their capital gains tax liability;
- d. calculate total taxable gains and tax payable thereon, using available reliefs and losses to reduce the liability, including the computation of double tax relief where appropriate;
- e. explain the principles of inheritance tax and identify the different classes of taxpayer liable to pay inheritance tax;
- f. explain the impact of an individual's domicile and deemed domicile on their inheritance tax liability;
- g. explain when the lifetime transfer of an asset gives rise to an inheritance tax liability, calculate the inheritance tax payable on chargeable lifetime transfers in straightforward scenarios and state the due date for payment;
- h. calculate the death tax due on lifetime transfers and state the due date for payment;
- i. calculate the value of an individual's estate at death and the inheritance tax due and state the due date for payment;
- j. describe the circumstances in which the following inheritance tax reliefs apply and calculate the amount of relief available in a given situation:
 - fall in value relief
 - agricultural property relief
 - business property relief
 - quick succession relief
 - taper relief; and
- k. calculate the interest and penalties due in respect of late payment of inheritance tax.

4 Corporation tax

Students will be able to calculate the corporation tax liabilities of companies.

In the assessment, students will be required to:

- a. explain the relevance of the distinction between revenue and capital for both receipts and expenses and apply the distinction in a given scenario;
- b. recognise the effect on trading profits of the treatment of:
 - provisions
 - capitalised revenue expenditure

- intangible assets;
- c. calculate trading profits or losses after adjustments and allowable deductions (including capital allowances on plant and machinery);
- d. calculate the chargeable gains and losses on assets, including chattels, leases, and shares and securities;
- e. describe the circumstances in which rollover relief applies and calculate the effect of full or partial relief available in a given situation;
- f. recognise the effect of the following issues on corporation tax payable:
 - having a period of account less than or more than 12 months in length
 - having one or more related 51% group companies;
 - being a member of a group;
- g. explain and illustrate how losses may be used effectively by a company or group;
- h. calculate the taxable total profit and the tax payable or repayable for companies including utilising losses to reduce the tax liability and the computation of double tax relief where appropriate; and
- i. identify the key features of the self-assessment system for companies, determine due dates for returns, payments and payments on account, and calculate the interest and penalties due for late submissions of returns, incorrect returns and late or incorrect payments of tax.

5 Income tax and NIC

Students will be able to calculate the amounts of income tax owed by or owed to individuals and trustees as well as the amounts of national insurance payable by employers, the self-employed and employees.

In the assessment, students may be required to:

Trading profits

- a. explain the relevance of the distinction between revenue and capital for both receipts and expenses and apply the distinction in a given scenario;
- b. recognise the effect on trading profits of the treatment of:
 - provisions
 - capitalised revenue expenditure
 - intangible assets;
- c. calculate trading profits or losses after adjustments and allowable deductions (including capital allowances on plant and machinery) using either the accruals basis or cash basis of accounting;

Unincorporated businesses

- d. calculate the assessable trading profits or losses of a partnership including after a change in the profit sharing ratio or change in partners, and allocate the profits or losses to each partner including the allocation of notional profits and losses;
- e. calculate the assessable trading profits or losses for a new unincorporated business and identify the overlap profits on the commencement of trade;
- f. calculate the assessable trading profits or losses for a continuing business;
- g. calculate the final assessable trading profits or losses for an unincorporated business ceasing to trade;
- h. calculate the assessable trading profits or losses of a continuing business following a change in accounting date; and
- i. explain and illustrate the possible uses of trading losses in a new or continuing business or a business ceasing to trade.

Taxation of income

- j. calculate assessable employment income for an employee or director, taking into account expenses, allowable deductions and assessable benefits;
- k. calculate taxable savings, income from property, dividend income, taxed income and investment income;

- l. describe and calculate the principal aspects of the taxation of property income, including interest relief, rent-a-room relief and premiums on short leases;
- m. explain the alternative ways in which an individual can provide for retirement and calculate the tax relief available;
- n. explain the impact of an individual's residence and domicile;
- o. calculate total taxable income and the income tax payable or repayable for trustees, beneficiaries, employees, company directors, partners and self-employed individuals including the computation of double tax relief where appropriate and payments under the self-assessment system; and
- p. identify the key features of the self-assessment system for individuals, determine due dates for returns, payments, and payments on account, and calculate the interest and penalties due for late submissions of returns, incorrect returns and late or incorrect payments of tax.

National insurance contributions

Students will be able to calculate the amounts of national insurance payable by individuals, businesses and companies.

In the assessment, students may be required to:

- q. identify the different classes of national insurance contributions;
- r. calculate the national insurance due on employment income and the assessable trading profits of the self-employed;
- s. explain and apply annual maxima rules for the payment of national insurance contributions; and
- t. calculate the total national insurance contributions payable by employees, employers and self-employed individuals.

SKILLS ASSESSED

Assimilating and Using Information

Understand the situation and the requirements

- Identify ethical issues in a given scenario

Identify and use relevant information

- Interpret information provided in various formats
- Evaluate the relevance of information provided
- Filter information provided to identify critical facts

Identify and prioritise key issues and stay on task

- Work effectively within time constraints
- Operate to a brief in a given scenario

How skills are assessed: candidates may be required to:

- explain the implications of proposed transactions in any of the following ways:
 - calculation of tax liabilities and reliefs available;
 - written description of tax treatments;
 - explanation of tax treatments in light of unstructured information relating to individuals, partnerships or companies;
 - description of the availability and values of tax reliefs within the context of numerical questions;
 - explanation of alternative tax treatments; and
 - explanation of ethical issues within given scenarios.

Structuring problems and solutions

Structure data

- Present analysis in accordance with instructions and criteria

Develop solutions

- Identify and apply relevant technical knowledge and skills to analyse a specific problem
- Use structured information to identify evidence-based solutions

- Select appropriate courses of action using an ethical framework

How skills are assessed: candidates may be required to:

- calculate tax liabilities from a given scenario;
- demonstrate relevant technical knowledge;
- perform relevant, accurate calculations in a logically structured way;
- identify different business entities and their tax status (eg, company, sole trader, partnerships), and understand the tax implications thereof;
- integrate verbal descriptions with calculations;
- use calculations to illustrate an answer; and
- provide relevant legal and ethical information in the context of a tax scenario.

Applying judgement

Apply professional scepticism and critical thinking

- Recognise bias and varying quality in data and evidence
- Identify faults in arguments
- Exercise ethical judgement

How skills are assessed: candidates may be required to:

- critically evaluate the quality, completeness and integrity of information put forward by tax payers.
- assess the legality of options and the consequences of various courses of action with regard to:
 - new client procedures;
 - HMRC errors;
 - money laundering;
 - tax avoidance and evasion.

Concluding recommending and communicating

Conclusions

- Apply technical knowledge to support reasoning and conclusions

Communication

- Present analysis and recommendations in accordance with instructions
- Prepare the advice, report, or notes required in a clear and concise style

How skills are assessed: candidates may be required to:

- analyse the implications of various courses of action out of a limited set of prescribed options.
- determine the tax implications of scenarios and proposals to provide alternative tax implications;
- take a given set of circumstances and reach a reasoned conclusion; and
- justify a conclusion made using knowledge of the existing tax regime.
- show an illustrative example of possible VAT treatments eg with regard to transactions involving land and buildings;
- show an illustrative example of inheritance tax implications of a proposed lifetime transfer or a transfer on death;
- show an illustrative example of the impact of residency status on income tax, capital gains tax or corporation tax; or
- show an illustrative example of whether an individual is trading by applying the badges of trade to reach a reasoned conclusion.

Technical knowledge

The tables contained in this section show the technical knowledge in the disciplines of financial reporting, audit and assurance, business analysis, ethics and taxation covered in the ACA syllabus by module.

For each individual standard the level of knowledge required in the relevant Certificate and Professional Level module and at the Advanced Level is shown.

The knowledge levels are defined as follows:

Level D

An awareness of the scope of the standard.

Level C

A general knowledge with a basic understanding of the subject matter and training in its application thereof sufficient to identify significant issues and evaluate their potential implications or impact.

Level B

A working knowledge with a broad understanding of the subject matter and a level of experience in the application thereof sufficient to apply the subject matter in straightforward circumstances.

Level A

A thorough knowledge with a solid understanding of the subject matter and experience in the application thereof sufficient to exercise reasonable professional judgement in the application of the subject matter in those circumstances generally encountered by chartered accountants.
